

CLUB COVID-19 BEHAVIOR

6/6/2020

As we resume functions of our club, we recognize new responsibilities in COVID-19 prevention strategies. As a club, we have agreed to a number of modifications to our clubhouse and the physical distancing recommended by our healthcare system. These changes include clubhouse restructuring to improve handwashing/sanitation, distances, and plexiglass screens for office interaction. We have given members and guests the option of wearing a mask when feasible, recognizing the person wearing the mask shows respect to his/her fellow shooters by reducing their potential exposure to the disease. It was with unanimous support for those safety measures despite varying opinions of their necessity or effectiveness, and the unselfish concern for other members that reminded me of the words “one nation, indivisible...” and that we face these difficult times as a team. I am proud to be a member of the Bandon Gun Club and thank all of its member for their patience in putting their passion of shooting sports aside during our current crisis.

Member and guests are encouraged to bring their own masks until all changes have been completed. Members and guests are also welcome to bring a sack lunch as all food service is discontinued until further notice. The soda and water machine and coffee will remain available.

**Thank you,
Wes Johnson
President Bandon Gun Club**
